SECTION I: SUBSTANCE IDENTIFICATION AND COMPANY INFORMATION

USA/CANADA EMERGENCY TELEPHONE: 1.800.535.5053 INTERNATIONAL EMERGENCY TELEPHONE: 1.352.323.3500

INFORMATION CONTACT: INFOTRAC

ADDRESS: 4700 MILLENNIA BLVD.., SUITE 150

MANUFACTURER'S NAME: ENTITY BEAUTY INC.

ORLANDO, FLORIDA 32839 USA

PRODUCT TYPE: NAIL

PRODUCT USE: NAIL PRIMER

ENTITY'S FORMULA NUMBER: 10001766-67-68

PRODUCT CODE: 4022238

FAMILY: CLEANSING AGENT TRADE NAME: NAIL DEHYDRATOR ISSUED: FEBRUARY 7, 2005

SECTION II: COMPOSITION AND INGREDIENT INFORMATION

<u>SAFETY PHRASES</u>: S7/9, S16, S24/25, S33, S37/39, S45 <u>RISK PHRASES</u>: R11, R20/22, R36/37/38 <u>HAZARD SYMBOLS</u>: XN, F INGREDIENTS:

CAS No.	<u>EINECS</u>	<u>U. S. INCI</u>	European INCI	Exposure OSHA TWA/STEL		Carcinogen IARC/NTP/OSHA	<u>%</u>
67-63-0	200-661-7	Isopropyl Alcohol	Isopropyl Alcohol	400 ppm	400 ppm	Not Listed	40-50
141-78-6	205-500-4	Ethyl Acetate	Ethyl Acetate	400 ppm	400 ppm	Not Listed	30-40
110-19-0	203-745-1	Isobutyl Acetate	Isobutyl Acetate	150 ppm	150 ppm	Not Listed	10-20

SECTION III: HAZARDS IDENTIFICATION

EMERGENCY OVERVIEW - This information is based on findings from related or similar materials.

- Flammable liquid and vapor!
- May cause skin irritation.
- May cause eye irritation.

Sub-Chronic Effects:

- Avoid prolonged or repeated breathing of gases, vapors or mists.
- Please read entire MSDS for additional information.

Potential Health Effects, Signs and Symptoms of Exposure:

Primary Route of Entry: Inhalation, skin and ingestion

Eye: Vapors are irritating to the eyes. Splashes may cause severe irritation, includes stinging, tearing,

redness and pain with possible corneal damage.

Skin: Prolonged or repeated contact may dry the skin. Symptoms may include redness, burning, drying and

cracking, and skin burns.

Ingestion: Swallowing small amounts during normal handling is not likely to cause harmful effects; swallowing

large amounts may be harmful. This material can get into the lungs during swallowing or vomiting.

Inhalation: Vapors are irritating to nasal passages and throat and may cause stupar or headache. Symptoms usually occur at air concentrations higher than the recommended exposure limits.

Significant exposure to this chemical may adversely affect people with chronic disease or may cause

damage to the respiratory system, skin and eyes.

NOTE: Refer to Section 11, Toxicological Information for Details

SECTION IV: FIRST AGE MEASURES

First Aid for Eye Flush eyes with water for 15 minutes, including under eyelids. If symptoms persist or there is any

visual difficulty, seek medical help.

First Aid for Skin Remove contaminated clothing. Wash exposed area with soap and water. If symptoms persist, seek

medical attention.

First Aid for Inhalation Remove to fresh air. If breathing is difficult, administer oxygen. If breathing has stopped, give

artificial respiration. If symptoms persist, seek medical attention.

side with the head down. Seek medical attention for advice about whether to induce vomiting. If

possible, do not leave individual unattended.

Page 2 of 5

SECTION V: FIRE FIGHTING METHODS

Flash Point (°F/°C) Flammable Limit (vol. %) Auto-ignition Temperature (vol. %)
TAG Closed: 68°F/20°C 400 ppm No Data

Method:

Extinguishing Media: Use CO2, dry chemcial for small fires, or alcohol type aqueous film forming foam.

Instructions: equipment including self contained breathing apparatus, with full face operated in

pressure demand. Fight fire from a safe distance/protected location.

Unusual Hazards: Flammable. When exposed to heat and flame, material is a fire explosion hazard. Vapor is heavier than air

and can travel considerable distance to source of ignition and flash back. Material creates a special hazard if

it floats on water.

SECTION VI: ACCIDENTAL RELEASE MEASURES

Spill or Release Procedures Eliminate all sources of heat and ignition. Use absorbent material for spills and dike it, wash spill material into retaining containers. Place containers in a well ventilated area. Consult an expert on disposal of recovered material and ensure conformity to local disposal regulations. Keep unnecessary and unprotected personnel from entering. Contain and recover liquid when possible. Use non-sparking tools and equipment. Collect liquid in an appropriate container or absorb with an inert material (e. g., vermiculite, dry sand, earth), and place in a chemical waste container. Do not use combustible materials, such as sawdust. Do not flush to sewer! US Regulations (CERCLA) require reporting spills and releases to soil, water and air in excess of reportable quantities. The toll free number for the US Coast Guard National Response Center is (800) 424-8802. EU Regulations require the consultation of Directive 98/24/EC. If a leak or spill has not ignited, use water spray to disperse the vapors, to protect personnel attempting to stop leak, and to flush spills away from exposures.

SECTION VII: HANDLING AND STORAGE

Handling: Keep containers cool and dry. Keep away from heat, light and ignition sources. Avoid breathing

high vapor concentrations. Avoid prolonged or repeated contact with skin. Use only with

adequate ventilation. Wash thoroughly after handling.

Storage: Store in well ventilated area. Store @ 70°F+/- 15°F (21°C+/-8°C), allow some air space above liquid

level. Keep containers closed while not in use.

Explosion Hazard: Vapors are heavier than air and may travel along the ground or may be move by ventilation and

ignited by pilot lights, other flames, sparks, heaters, smoking or other ignition sources at locations distant from material handling point. Never use welding or cutting torch on or near drum (even

empty) because product (even just residue) can ignite explosively.

SECTION VIII: EXPOSURE CONTROLS / PERSONAL PROTECTIVE EQUIPMENT

Engineering Controls:

Facilities storing or ultilizing this material should be equipped with an eye facility and safety shower. Use process enclosures local exhaust ventilation, or other engineering controls to control airborne levels below recommended exposure limits. Use explosion-proof ventilation equipment.

Personal Protective Equipment

General:

To identify additional Personal Protective Equipment (PPE) requirements, it is recommended that a hazard assessment in accordance with the OSHA PPE Standard (29CFR1910.132), or European Standard EN166 be conducted before using this product. Provide eye wash stations and safety showers. Wear impervious clothing to prevent ANY contact with this product, such as gloves, apron, boots, or whole body suit. Nitrile rubber is better than PVC.

Page 3 of 5

Eye/ Face Protection:

Chemical splash goggles in compliance with OSHA regulations are advised; however, OSHA regulations also

permit other type of safety glasses.

Skin Protection:

Use impermeable clothing to prevent ANY contact with this product, such as gloves, apron, boots, or whole

body suit. Neoprene and Nitrile rubber is better than PVC..

Respiratory Protection:

A NIOSH/MSHA approved air purifying respirator with an organic vapor cartridge or canister may be permissible under certain limited circumstances where airborne concentrations are expected to exceed exsposure limits. Protection provided by air purifying respirators is limited. Wear a NIOSH/MSHA or European Standard EN 149 approved full-facepeice airline respirator in the positive pressure mode with emergency escape provisions. Follow OSHA repsirator regulations found in 29 CFR 1910.134 or European

Standard EN 149.

SECTION IX: PHYSICAL AND CHEMICAL PROPERTIES

Appearance	Odor & Odor Threshold	PН	Specific Gravity	Viscosity	% Volatile
Clear, colorless, mobile liquid	fruity, pungent mix odor	N/A	(H2O = 1):	N/A	W/W % : 99+

Boiling Point/ Freezing Point	Decomposition Temperature	Octanol/Water Partitioning Coefficient Log Po/w	Vapor Pressure	Vapor Density	Evaporation Rate	Ignition	Solubili ty In Water (20°C)
77°C	N/DA	N/DA	73mm Hg@20°C	(Air=1):3. 0	Butyl Acetate=1:4. 5	N/A	8.7 %

Flash Point(°F/°C)	Flammable Limit (vol. %)	Auto-ignition Temperature(vol. %)
68°F/20°C	LEL: 2 % ; UEL: 11.4 %	N/DA

SECTION X: STABILITY AND REACTIVITY

Stability: Stable

Incompatibility (Materials to Avoid):

Oxidizing Agent i.e. Hydrogen peroxide, Nitric Acid,

Hazardous Decomposition Products: Carbon Monoxide Perchloric Acid, Chromium Trioxide

Hazardous Polymerization:

Conditions to Avoid: Will not occur

Heat, flames, ignition sources, and incompatibles

SECTION XI: TOXICOLOGICAL INFORMATION

Acute Oral Toxicity	Acute Dermal Toxicity	Acute Inhalation Toxicity	Irritation – skin	Irritation – Eye
Mouse: LD50 = 3600	No Data	Rat = 1030 ug/m3/16W	Skin, rabbit:	No Data
mg/kg;			LD50 = 12800 mg/kg.	

Sensitization	Mutagenicity	Sub-chronic Toxicity	
No Data	Rat = 1030 ug/m3/16W	No Data	

SECTION XII: ECOLOGICAL INFORMATION

Acute Toxicity to Fish	Acute Toxicity to Invertebrates	Acute Toxicity to Algae	Bioconcentration	Toxicity to Sewage Bacteria
The LC50/96-hour values for fish are over 100 mg/l.	N/ DA	N/ DA	N/ DA	N/ DA

Page 4 of 5

Chemical Fate Information

Biodegradability	When released into the soil, this material is expected to quickly evaporate. When released into the soil, this material
·	may leach into groundwater. When released into the soil, this material may biodegrade to a moderate extent. When
	released to water, this material is expected to quickly evaporate. When released into the water, this material is
	expected to have a half-life between 1 and 10 days. When released into water, this material may biodegrade to a
	moderate extent. This material is not expected to significantly bioaccumulate.
Chemical Oxygen Demand	N/ DA

SECTION XIII: DISPOSABLE CONSIDERATION

Dispose of diking materials and absorbent in compliance with State, Local, and Federal regulations. Residual vapors may explode on ignition; do not cut, drill, or weld on or near the container. Mix with compatible chemical which is less flammable and incinerate. Whatever cannot be saved for recovery or recycling should be handled as hazardous waste and sent to a RCRA approved waste facility. Processing, use or contamination of this product may change the waste management options. State and local disposal regulations may differ from federal disposal regulations. Dispose of container and unused contents in accordance with federal, state and local requirements. For EU Member States, please refer to any relevant Community provisions relating to waste. In their absence, it is useful to remind the user that national or regional provisions may be in force.

SECTION XIV: TRANSPORTATION INFORMATION

DOT (49 CFR 172)	
Proper Shipping Name:	Flammable liquids, n.o.s., (ethyl acetate, isopropyl alcohol), 3, UN1993, PGII
Identification Number:	UN1993
Marine Pollutant:	No
Special Provisions:	T8, T31
Emergency Response Guidebook (ERG) #:	128
IATA (DGR):	
Proper Shipping Name:	Flammable liquids, n.o.s., (ethyl acetate, isopropyl alcohol), 3, UN1993, PGII
Class or Division:	3
UN or ID Number:	UN1993
Packaging Instructions:	
Emergency Response Guidance (ICAO)#:	
IMO (IMDG):	
Proper Shipping Name:	Flammable liquids, n.o.s., (ethyl acetate, isopropyl alcohol), 3, UN1993, PGII
Class or Division:	3.2
UN or ID Number:	UN1993
Special Provisions & Stowage/Segregation:	None
Emergency Schedule (EmS)#:	
Other Information:	Flash point = 20°C

SECTION XV: REGULATORY INFORMATION

US Federal Regulations

Clean Air Act: HAP/ODS	This product contains the following HAP's or ODS: • NONE		
Clean Water Act: Priority Pollutant	The following ingredients are listed as hazardous pollutants under the CWA:		
	Isobutyl Acetate, CAS# 110-19-0		
	None of the ingredients are listed as primary pollutants nor are they listed as toxic pollutants.		
FDA: Food Packaging Status	This product has not been cleared by the FDA for use in food packaging and / or other applications as an		
	indirect food-packaging additive.		
Occupational Safety and Health Act	This product is considered to be hazardous under the OSHA Hazard Communication Standard. It's hazards are:		
	Immediate (acute) health hazard		
	Fire hazard		
SARA Title III: Section 302	This product contains no chemicals regulated under Section 302 as extremely hazardous substances.		

Page 5 of 5

	1 age 3 of 3
SARA Title III: Section 304	This product contains chemicals regulated under Section 304 as extremely hazardous chemicals for emergency
	release notification ("CERCLA" List):
	• Ethyl Acetate CAS# 141-78-6, RQ (Lbs) 5000
	• Isobutyl Acetate CAS# 110-19-0, RQ (Lbs) 5000.
SARA Title III: Section 311-312:	This product is considered to be hazardous under the OSHA Hazard Communication Standard and is regulated
	under Section 311-312 (40 CFR 370). It's hazards are:
	Immediate (acute) health hazard
	Fire hazard
SARA Title III: Section 313:	This product contains the following chemicals which are subject to the reporting requirements of Section 313 of
	Title III of the Superfund Amendments and Reauthorization Act of 1986 and 40 CFR Part 372:
	• Isopropyl Alcohol CAS# 67-63-0
TSCA Section 8(b): Inventory:	This product contains chemicals listed on the TSCA inventory or otherwise complies with TSCA
	premanufacture notification requirements.

SECTION XVI: OTHER INFORMATION

The information presented herein was obtained from sources considered to be reliable. However, this information is provided without any warranty, expressed or implied, regarding its correctness or suitability for consumers intended use and/or application. For this and other reasons, we assume no responsibility and expressly disclaim liability for loss, damage or expense arising out of any way connected with the handling, storage, use or disposal of the product. This MSDS was prepared expressly for this product. Use the materials only as directed. If the product is used as a component of another product, the information contained within the MSDS may not be applicable. If one could have any concerns with or problems understanding this MSDS form, please direct all questions to INFOTRAC, Chemical Emergency Resources System at 1(800) 535-5053.
