

# SNS Gelous Color on Natural Nail

## Items Needed

Gelous Color, Natural Set Sheer, E.A. Bond, Gelous Base, Sealer Dry, Gel Top, Vitamin Oil

## Preparation Steps

Always sanitize your customers hands with 100% Alcohol, as well as your own hands, before performing any service.

## Step 1

Shape all 10 nails.

## Step 2

Push back the cuticles (if cuticle remover is used, client must wash their hands before step 3).

### Step 3

Buffer all 10 Nails.

### Step 4

Apply **E.A. Bond** to all 10 nails (use a napkin to dry them well before applying the Gelous Base application).

**Notice:**

1. Watch DVD well for the: Gelous Base technique application, if not the color will miss the cuticle area.

# Dipping Powder Steps

## Step 1

Apply **Gelous Base** on the entire nail.

## Step 2

Then dip in the **Gelous Color** and tap excess powder off. Repeat this step for all 10 nails.

### Step 3

Dust free all 10 nails by acrylic brush then repeat steps 1 & 2 for second layer.

### Step 4

Apply thin coat of **Gelous Base** then dip in **Natural Set Sheer**, repeat for all 10 nails then apply Sealer for all 10 nails.

## **Notice:**

1. When using Gel Top and Base, avoid the cuticles or it may cause lifting problems.
2. To avoid chipping at the tip, apply sealer underneath the nails then apply very thin coat of Gel Top to protect from water, which causes chipping.

# Finishing Steps

## Step 1

Shape all 10 nails\* (may use the nail machine with fine paper sander around the cuticle and use with slow speed, in case the nail plate is waving).

## Step 2

Buff all 10 nails and wash the hands.

### Step 3

Apply **Sealer Dry** to all 10 nails, and then wipe them off with a paper towel.

### Step 4

Apply the first coat of **Gel Top** quickly and as thin as possible for five nails, and then reapply the second coat in the same way. Repeat the same on the second hand.

## Step 5

Wait for 1 to 2 minutes. Apply **SNS Vitamin Oil** and massage the hands to finish.

### Notice:

1. Apply Gel Top, quick and very thin or it may cause nail to not dry and the brush get hard.
2. After each client, always sanitize your brush with 100% alcohol and dry well.
